Division of Hematopathology

Clin-Path Associates' Hematopathology Division provides specialized diagnostic services for all specimens related to diseases of the blood, bone marrow, and lymph nodes that are processed at Clin-Path Diagnostics Laboratory. These services include routine tissue staining as well as special stains, state of the art immunohistochemistry, flow cytometry, and fluorescence in-situ hybridization (FISH) analysis. Clin-Path Diagnostics was chosen to be first in the nation to install the Ventana Ultra random access immunohistochemistry analyzer allowing a throughput of tissue immunohistochemistry stains not previously available.

Our four board-certified Hematopathologists have 54 years combined hematopathology practice, bringing the combined experience of the University of Texas Health Sciences Center at San Antonio, M.D. Anderson Cancer Center in Houston, TX, University of Iowa Hospitals and Clinics in Iowa City, IA, and the University of Washington Medical Center in Seattle, WA.

Clin-Path Associates, PLC consists of 30 board certified pathologists with subspecialty fellowship trained hematopathologists, cytopathologists, gastrointestinal pathologists, dermatopathologists, and a pediatric pathologist who are available within the group to provide rapid consultation when required. Our clients include hospitals, surgicenters and endoscopy centers. We strive to provide diagnoses that are accurate, timely, clear, and informative. Excellent service compliments our diagnostic strength, with most specimens signed out within 24 hours of receipt. We emphasize building and maintaining strong relationships with the clinicians we serve and are always available to answer your questions. We take seriously the trust our clinical colleagues place in us as their pathology consultants. Our primary focus is always on providing the best possible care for our mutual patients.

Philip R. Zollars, M.D.
